Military Status: Currently Serving (Expected Completion: June 2027)

SUMMARY

Full-Stack Web Developer specializing in open-source technologies, leveraging the MEARN stack (MongoDB, Express, Angular, Node.js, and React) to design seamless user interfaces and robust backend systems. **Proven track record** of delivering production-ready applications, including e-commerce and crowdfunding platforms, while collaborating within Agile team environments. **Strong technical foundation** in RESTful APIs, Git version control, secure database management, and modern JavaScript development across the entire software lifecycle.

EDUCATION

Professional Training Program (9-Month) in Open Source Applications Development, Information Technology Institute (ITI) Oct '25 — Present
Zagazig

Bachelor of Science (B.Sc.) in Computer Science, Zagazig University (GPA: 3.32 / 4.0) Oct '21 — Jun '25
Zagazig

- **Graduation Project:** Developed an AI-powered system that processes live video input to extract frames, generate descriptive captions using deep learning models, and analyze them to interpret events, converting results into speech output. The project was designed with accessibility in mind to assist visually impaired users, with potential for deployment on mobile and web platforms.

EXPERIENCE

Freelance Full-Stack Web Developer Jul '25 — Present
Mostaql (Freelance Platform) Remote

- Worked with clients on Mostaql to analyze requirements and understand business needs.
- Proposed simplified web-based solutions to improve existing workflows and user experience.
- Participated in client meetings and translated problems into practical technical approaches.

SKILLS

Programming & Scripting Languages Python, PHP, Java, Ruby, ES6, Bash Scripting
Frontend Development HTML5, CSS3, Bootstrap, Angular, ReactJS, Next.js, VueJs
Backend & Frameworks Nodejs, Nestjs, PHP Frameworks, Odoo, PHP CMS, GraphQL, RESTful API
Databases MySQL, MongoDB
Cloud, DevOps & Systems Red Hat System Administration, Linux, Cloud Computing, Docker Fundamentals, Apache Web Server, Version Control
Software Engineering Principles Data Structures, Object-Oriented Programming, Design Patterns
AI & Modern Workflows GenAI, Prompt Engineering, AI API Integration

PROJECTS

- E-Commerce Platform (MEAN Stack)** Link
- **Collaborated in an Agile team** as a Full-Stack Developer to build a responsive e-commerce web application from scratch.
 - **Developed interactive user interfaces** using **Angular** and constructed robust backend services and RESTful APIs using **Node.js** and **Express**.
 - **Managed data and version control** by integrating a **MongoDB** database for dynamic data storage and utilizing **Git/GitHub** for smooth team collaboration.
- RESTful Blog Backend (Node.js)** Link
- **Built a full-featured RESTful Blog API** with authentication, posts management, comments, likes, and notifications system.
 - **Implemented secure JWT-based authentication** with password encryption, email verification, and password reset functionality.
 - **Designed a scalable backend architecture** with file uploads, search, pagination, and security best practices (rate limiting, XSS, CORS).
